DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-20 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 15-17 of U.S. Patent No. 6,689,760. Although the conflicting claims are not identical, they are not patentably distinct from each other.

The examined claims are either anticipated by, or would have been obvious over, the reference claim(s). Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are generic to all that is recited in claims 15-17 of US 6,689,760. That is, claims 15-17 of US 6,689,760 fall

Art Unit: 1623

entirely within the scope of claims 1-20 or, in other words, claims 1-20 are anticipated by claims 15-17 of US 6,689,760.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, variables R1 and R2 are not properly defined. It is unclear how the moieties "CH₂-CH₃⁻", "O(CH₂)₃O" and "OCH₂" are attached to variable X. Also, it is unclear how the negative charge on moiety "CH₂-CH₃⁻" arises.

In claims 2-11, the terms "formula C1", "formula C2", "formula C3", "formula C4", "formula C5", "formula S1", "formula S2", "formula S3", "formula S4", and "formula S1" are not defined in the claims.

In claim 12, the phrase "wherein the compound is derivatized by covalently linking a derivatizing group on a portion of the compound required for binding to an NAD-requiring enzyme" renders the claim indefinite as applicant has failed to particularly and distinctly set forth the identity of said compound.

Conclusion

5. Claims 1-20 are pending. Claims 1-20 are rejected. No claims are allowed.
